Pre-launch vs. Post-launch Optimization

The background of the slide features a close-up, slightly blurred image of two green spark plugs. They are positioned vertically, with a coiled green wire extending from the top of the plug on the right. The entire scene is set against a solid green background, creating a monochromatic effect.

High-traffic vs. Low-traffic Optimization

The background of the slide features a faded, green-tinted image of two car shock absorbers. One shock absorber is in the foreground, showing its coil spring and top mount, while another is slightly behind it to the left. The overall aesthetic is clean and technical.

Low-traffic Website relay more on pre-launch optimization methods.

Do you want to have more business success? Mastering body language is the missing ingredient for many business owners. Nonverbal communication can not only help you be more effective in your business dealings, but it can also give you an added edge above competitors.

93% of our communication is nonverbal.

But we rarely think about our body language when dealing with clients, investors or at networking. We think about what we are going to say, but we don't consider how we say something. Research shows how we say something is even more important than what we say.

This course is made up of the 6 areas every entrepreneur needs and how body language can help you succeed.

Customer Relations:

- Building Rapport
- Successful Selling
- Winning Client Relations
- Customer Validation
